

Professional Salon Products – Ingredient Disclosure Victory!

On September 14th, California Governor Jerry Brown signed the Professional Salon Products Labeling Act (AB 2775) into law. Previously, professional salon products did not have the same ingredient disclosure requirements as products sold in retail outlets, leaving workers and consumers in the dark about potentially harmful ingredients in the products they use. However, with the passage of AB 2775, companies that sell professional nail, hair and beauty salon products in California are now required to disclose ingredients on product labels. As companies move to comply with this new labeling law, the impact will be felt across the country. This makes 11 bills, passed at the local, state or federal level in the last 15 years, where BCPP has taken a central leadership role!

Landmark Fragrance Right-to-Know Product Testing Report

On September 26th, BCPP released our report “Right to Know: Exposing toxic fragrance chemicals in beauty, personal care and cleaning products.” We embarked on this multi-year project to investigate to what extent companies that make beauty, personal care and cleaning products were hiding unlabeled toxic chemicals in their products. Currently, a gaping federal labeling loophole and a self-regulated fragrance industry allow dozens, sometimes even hundreds, of chemicals to hide under the word “fragrance” on the product labels. In the end, our project concluded with some shocking results: The most hazardous product of all was a kid’s shampoo marketed to children of color. Several of the products that had the most hazardous chemicals were fine fragrances endorsed by popular celebrities. And our most counterintuitive report finding of all: Many of the personal care products we tested contained more hazardous chemicals than the cleaning products we tested!

California Breast Cancer Primary Prevention Plan – Forging Ahead

In 2016, BCPP began a multi-year project to lead the development of a comprehensive, statewide Breast Cancer Primary Prevention Plan for California. The goal of the project is to generate policy and social interventions that support actions to reduce modifiable breast cancer risk factors. In 2018, BCPP traveled throughout the state gathering input in communities from Nevada City to Los Angeles. We heard from people on the ground about challenges they face related to breast cancer risk and interventions that they would like to see tried. These rich conversations have not only given us access to community wisdom not reflected in scientific research, but have also allowed us to form relationships with groups that will be critical in the implementation stage of the project. Stay tuned for the release of the plan in 2019!

State of the Evidence: Congressional Briefing

On June 6th, BCPP organized, and Sen. Kamala Harris hosted, a Congressional briefing entitled “State of the Evidence: The Connection Between Breast Cancer and the Environment.” Janet Gray, primary author and BCPP Board Member, and Julia Brody, Executive Director of our partner organization, the Silent Spring Institute, provided a compelling and accessible summary of the current science that provides the foundation for our work. Nancy Buermeier, Senior Policy Strategist, and Nourbese Flint from Black Women for Wellness addressed policy solutions for community and place-based exposures, consumer products, chemical policy reform, and occupational exposures. Laying the foundation of science and continuing to highlight the work of BCPP is critical to our effectiveness in Congress.
